

THE FUTURE OF SHOWER GLASS **PROTECTION**

Experience the Diamon-Fusion® difference.

Diamon-Fusion protective coating

Regarded as a leader in both durability and ease of cleaning, Diamon-Fusion is a low-maintenance coating that transforms ordinary shower glass into an extraordinary high-performing surface. Its patented formula keeps the surface looking like-new and significantly easier to clean.

Fused on the glass via machine application

Utilizing DFI's FuseCube™, Diamon-Fusion protective coating is fused onto the shower glass through a chemical vapor deposition process for superior quality and maximum consistency.

Complete customer care

Diamon-Fusion treated shower doors come with a lifetime warranty that can be registered at dfsolutions.com/warranty. Once registered, DFI handles everything. That includes taking all your customer callbacks, as well as sending automated emails on how to care for and maximize their Diamon-Fusion treated shower enclosures.

Eliminates backward installations

Through precise machine-controlled application, Diamon-Fusion is applied to both sides of the shower glass, ensuring uniform coverage and no backward installations. The result: faster, more confident installations with consistent coverage.

Double-sided coverage, single-sided price

Reward yourself with two-times the shower door protection for the single-sided price and spread the benefits. The FuseCube automatically applies Diamon-Fusion on both sides of the shower glass, providing twice the protection, clarity and ease of cleaning for your consumers, as well as a new differentiator and increased market share for your business.

Marketing that works as hard as you do

How does having a full-time marketing team without the associated costs sound? Done and done. With in-store promotional items for you and personalized automated emails to educate your customers upon registering their Diamon-Fusion warranty, DFI will build your brand and help you sell.

About Diamon-Fusion International (DFI)

As a global developer of low-maintenance coatings, DFI has positioned itself as the most trusted glass protectant for homeowners and glass fabricators worldwide. From inside and outside the home to commercial exterior glazing, Diamon-Fusion provides durable, long-lasting protection with a specific aim to make cleaning easier.
